AFAM COMPUTER PROJECT HISTORICAL PERSPECTIVE

The Committee discussed the theme to focus the launching on, and came up with "Providing Computers to Secondary Schools in ten communities in Anambra State". The communities will be a reflection of AFAM member's home town. The idea was accepted by the house. Source: Recorded minutes of January 28, 2012

Nonprofit donates computers to Nigeria

Locals 'give back' to high schoolers in their homeland

Dr. Peter Azogini lives a comfortable lifestyle in Collierville, but still remembers what it was like growing up in Anambra State, Nigeria.

Because of that, Azogini, 52, wanted to apply a lesson he learned over 20 years living in the U.S. — how to give back.

Azogini, the president of Anambra Family Association of Memphis, and members of the nonprofit group composed of more than 20 families from the state who now live in the Mid-South, will ship 25 HP computers for high school students to Anambra State later this month.

"In Nigeria, we don't have a lot of computers, especially in high schools," Azogini said. "It's almost zero. To us, it's a big deal for those kids, just to help them get online and see the World Wide Web,

Dr. Peter Azogini, president of Anambra Family Association of Memphis, shows off 25 HP computers the organization will ship to the Nigerian state of Anambra for high school students there. "This country (the U.S.) taught us how to give back," he said. NIKKI BOERTMAN/THE COMMERCIAL APPEAL

but also learn how to use computers."

AFAM began raising money for the computers nearly two years ago when it held its inaugural launching and fundraising event to benefit schools in Anambra State. Money came from members, donations and fundraisers.

"Back in the day, we didn't have the Internet and cellphones and all of that," said Gibson Egwudobi, 54, an AFAM member. "Now, younger folks have access to the Internet, so the community is getting a little smaller. Knowledge is power."

Azogini said high school students in Nigeria often must learn on their own.

"It gives us the ability to study," he said. "It gives you an opportunity to have what I call good study habits."

AFAM, which was formed in 2006 and received nonprofit status in 2008, has made donations to local organiza-

tions like the Alpha-Omega Veteran Association, the Dorothy Day House of Hospitality, St. Jude Children's Research Hospital and the American Red Cross of Jackson, Tenn.

Azogini said 95 percent of AFAM members are physicians, and about half went to the University of Nigeria, where they received a free education. Because of that, they felt it was necessary to give back to their country.

"This country (the U.S.) taught us how to give back," he said. "People back home can make money, but they don't know how to freely give without expecting something in return. I learned that here, giving back to the community.

"Our mission is to pay our country back. It's not a huge gift, but it's a start."

In the future, Azogini said AFAM may look into giving to other Nigerian states.

HEAD TABLE

<u>Dr. Peter Azogini</u>

"Today, we have come home to our beloved Anambra State to give back. Anambra State is the light of the nation and there is no better way to keep this light shining than through education. So Hon. Commissioner, members of AFAM are committed to educating our children and we are demonstrating this through our small goodwill donation today."

Dr. Peter Azogini

"We are impressed with infrastructure improvements in schools as well as the expansion of information technology which is available to our school children now and in future. Just a few weeks ago Anambra emerged the overall best in the West African School Certificate Examination last year".

(Punch Newspaper April 20, 2014)

Hon. Dr. V.V.I. Okoye

"We are not here to show off, but to show support".

"The donation of computers to high schools in Anambra State is an example of **Public Private** Partnership".

"It is not about the quantity of computers donated by AFAM, but the heart".

"Anambra State Ministry of Education operates on ten shares values one of which is -Making a positive impact on the students, and that is what AFAM has done".

"We want to bring back passion into education. That goes for the administrators, teachers, students, parents and partners. It is passion that brought AFAM here today".
